PROFESSIONAL EXPERIENCE

Frontend Engineer in Qbots *September 2021*

- Over two years, developed and optimized multiple web-based solutions, focusing on automation, efficiency, and user experience.
- Built a restaurant automation platform, including a QR menu, cashier interface, mobile waiter app, and managerial dashboard, enhancing efficiency and customer experience.
- Developed a healthcare app for nurses to monitor patients with chronic conditions. Enabled daily patient engagement, report generation, and profile management, streamlining workflows.
- Implemented a sales automation system with five interfaces for wholesalers and retailers, facilitating transactions, order management, and delivery coordination.
- Used technologies: HTML, CSS, Vue, TypeScript, Vuex, TailwindCSS.

Frontend Engineer in M4Bank *March 2024*

- Developed a web-based terminal management system for a company specializing in payment aggregators and acquiring systems. Implemented various features, optimized and refactored code to enhance performance and maintainability.
- Integrated data visualization libraries to display key metrics and improve user experience. Conducted thorough code reviews to ensure high-quality standards and best development practices.
- Used technologies: Vue 2, Vue 3, TypeScript, Vuex, Vuetify, Vuelidate.

Frontend Engineer in KMF Bank *May 2025*

- Developed and maintained a Back Office web application for KMF Bank, used by internal employees to serve clients and process core banking operations.
- Participated in building features for client onboarding, account opening, deposits, cash withdrawals, and both internal and interbank transfers.
- Contributed to the digital transformation of the company from a microfinance organization (MFO) into a fully licensed bank by developing and adapting business-critical functionality.
- Used technologies: Vue 3, TypeScript, PrimeVue, Vuelidate, KeyCloak.

EDUCATION

Al-Farabi Kazakh National UNIVERSITY *June 2022*

Bachelor of informational systems

PERSONAL PROJECTS

Freelance as Frontend Engineer

- Developed a website for a software and mobile app company, utilizing HTML, CSS, JavaScript, and TailwindCSS to deliver a visually appealing and responsive user experience.
- Developed a task management web application for freelancers and small teams, enabling users to create, organize, and track tasks efficiently. Implemented a responsive UI with Vue.js and Vuetify, integrated Vuex for state management, and optimized performance for a seamless user experience.
- Successfully completed a diploma project focused on e-commerce for a bicycles shop, utilizing a combination of front-end web development technologies including HTML, CSS, JavaScript, TailwindCSS, and VueJS.
